x = Licensed for USA (excluding AZ, CA, OR, and WA)
 x° = Licensed for USA (exclusive for AZ, CA, OR, and WA)

Blueberry varieties developed by the University of Florida are patent protected under U.S. Code Title 35. Anyone propagating plants for their own use or for sale is required to be licensed by Florida Foundation Seed Producers, Inc. (FFSP). Additionally, packers, marketers, and sellers of fruit from the above varieties can be liable for selling fruit from illegally propagated plants. As of Nov. 10, 2011, the above entities are the only entities licensed for legal propagation and sale of plants of the respective varieties. Protect yourself from unknowingly purchasing illegal plants or fruit

by asking entities if they are licensed to propagate and if fruit has come from legal plants.

Illegal propagation is a direct threat to the blueberry industry and the patent rights held by FFSP. Royalties generated are critical to the support of the Florida blueberry breeding program. If you are interested in obtaining a license or would like to anonymously report illegal propagation, please contact: FFSP, PO Box 110200, Gainesville, FL 32611, Phone: 352-392-9446, Fax: 877-839-9162, Email: beutt@ffsp.net.

Ask the Question!

“Are You Licensed?”
